EDUCATION

Bachelor of Engineering (B.E) — Computer Science Engineering 2026
Shree L.R. Tiwari college of Engineering &Technology | Course work: AI, ML, DS, DBMS, Computer Networks, AOA

SKILLS

Programming: Python, JavaScript, TypeScript fundamentals, HTML, CSS, Linux/command line
Full- Stack Development: MERN stack (MongoDB, Express.js, React, Node.js) — academic/practical implementation; Vite; REST/API integration; Git and GitHub
AI /Machine Learning: Generative AI, Gemini API, prompt engineering, multi-turn AI interactions, NLP, BERT, LSTM, graph neural networks (GNNs), knowledge graphs, ensemble learning
Cloud & Data: Firebase Authentication, Cloud Firestore, Google Cloud Run, pandas, OpenPyXL, Excel, Tableau, data analysis and visualization
Automation & Security: UiPath, RPA workflow design, scheduling, error handling, process documentation, vulnerability scanning fundamentals, VAPT reporting
Tools & Communication: ChatGPT, GitHub Copilot, Anthropic Claude, Google AI Studio, Gemini API; technical documentation, research, task coordination, cross-functional collaboration

PROJECTS

Health-Care Chat bot *Minor Project | Python · BERT ·NLP* **2025**
Contributed to backend research and model selection for a healthcare-information chatbot. Compared NLP model options and supported documentation, planning, and system design. A System and Method for Concurrent Multi-Disease Prediction via Knowledge-Guided Graph Neural Networks and Ensemble

AI-Model for Multi-Disease Prediction *Major Project | Python · Pytorch · GNN · Ensemble Learning · LSTM · Knowledge Graph* **2026**
Contributed to a hybrid AI approach combining temporal modelling, knowledge graphs, graph neural networks, and ensemble learning for concurrent multi-disease prediction. Project materials report results of up to 0.931 ROC-AUC and 0.923 accuracy across Heart Disease, Parkinson's, and Diabetes datasets; interpret these as project-reported metrics, not clinical validation.

Luminary *Personal Gemini Journal | React . TypeScript . Node.js . Gemini API . Firebase . Cloud Firestore . Google Cloud Run* **2026**
Built a reflective journaling web app with multi-turn Gemini conversations, entry summaries, and configurable reflection styles. Implemented Google Sign-In and user-scoped Firestore data paths/rules to separate journal entries and conversation history. Routed Gemini requests through a server-side Express service deployed on Google Cloud Run, keeping the API key out of the browser bundle. Designed time-adaptive themes and an interactive 3D constellation view for exploring connections between journal entries

EXPERIENCE

RPA Analyst Intern — Intelliqon Technologies **Jan-Mar 2026**
Developed UiPath automations for Amazon and Flipkart seller operations, covering inventory, orders, listings, pricing, and reporting.
Built Python utilities with pandas and OpenPyXL to support data handling and operational workflows.
Added error handling, scheduling, and documentation to support reliable automation runs.
Coordinated tasks and timelines with project teammates and supervisors..

Designing Intern — Karapuargaur.ai Technologies **Aug-Oct 2025**
Supported front-end work using HTML and CSS, including UI updates and layout fixes.
Collaborated on documentation, product-improvement discussions, and sprint tasks.
Gained exposure to Git and collaborative software-development workflows.

Cybersec Intern — SLRTCE **Aug-Oct 2025**
Practiced identifying common vulnerabilities and preparing a basic VAPT report under supervision.
Documented risks and controls and used Linux commands in system- and network-security exercises.

CERTIFICATIONS & PUBLICATIONS

- Certification of Publication, "A System and Method for Concurrent Multi-Disease Prediction via Knowledge-Guided Graph Neural Networks and Ensemble Learning" — IISTJ (Co-Author) 2026
- Rewrite AI: AI fundamentals — IBM Skillbuild Aug 2026
- AWS Cloud Essentials — AWS Aug 2024
- McKinsey.org Forward Program — Mckinsey.org Jun 2026
